WHY CHOOSE GT AUTOMOTIVE ?

Our aim is simple; to provide the automotive industry with trusted, OE quality products at a competitive price.

GT Automotive is a quality-driven supplier specialising in the manufacture and distribution of automotive parts. We have partnered with several key manufacturers to bring competitively priced OE quality products to the UK and European markets. With these established partnerships, our portfolio is more extensive than ever, especially after our move in to suspension parts with Maysan Mando.

With a huge stock base in our Oxfordshire warehouse facility, GT Automotive can cover a vast range of applications with fast and efficient delivery. With core values of quality, service and product value at the heart of our expansion, GT Automotive is proud to be one of the up and coming brands in the UK market.

Manufacturing and OE Heritage

GT Automotive originates from the manufacture of engine components; having been involved in the production of camshafts for the global market for over 20 years. Over this time, we have worked with OEMs such as Ford, TVR, Nissan, Cummins and Scania to name just a few.

With years of experience and a wealth of expertise from OEM projects and wholesale distribution behind the team, GT Automotive camshafts have become a well-established product range, renowned for consistently high quality and a huge variety of applications.

GT Automotive is now applying this OEM experience and manufacturing knowledge to a wider range of quality products as we look to expand the GT brand in the aftermarket, adhering to the same principles of quality, service and value for every product we release.

At a glance... Why Choose GT Automotive?

- OE Quality, competitive prices- every time
- Thousands of UK car parc applications covered
- No quibble warranty on replacement part
- Quick access to the latest parts and applications
- Autocat certified for easy sourcing
- Trusted UK brand
- One location, one factory for each range giving full traceability
- Excellent customer and aftersales support

GT Automotive Crankshaft Pulleys

Successfully Delivering OE
Quality at a Competitive Price

Why Choose GT Automotive?

- ⦿ OE Quality at competitive aftermarket prices
- ⦿ Thousands of applications covered by UK held stock
- ⦿ No quibble 12 Month / 12,000 Km warranty
- ⦿ Quick access to the latest R&D innovation
- ⦿ Empower & AutoCat certified for easy sourcing
- ⦿ Excellent customer and aftersales support
- ⦿ Trusted UK built brand
- ⦿ One location, one plant giving full traceability

Why Do Pulleys Need Replacing?

- ⦿ Deterioration of the internal rubber of a TVD can effect the belt condition and performance, leading to engine misfire
- ⦿ If vibrations are not being controlled, this can wear the bearing or cause crankshaft failure
- ⦿ A failing TVD can cause severe engine noise from vibrations
- ⦿ Impact on torque and the fuel economy

Ultimately, early replacement of a crankshaft pulley can not only increase the lifecycle of the drive belt, but can increase the engines lifespan overall.

Advanced R&D producing the most relevant new references

"At GT Automotive, we are extremely proud to have formed a partnership with Marathon Warehouse Distribution; one of the largest distribution platforms in the UK for aftermarket automotive parts.

Our range of OE quality Crankshaft Pulleys, built on the back of years of manufacturing pedigree, exists to fill a gap in the market for quality parts at a competitive price.

The Marathon same day delivery network and Empower B2B platform, combined with our competitive pricing and OE quality, make our partnership a force to be reckoned with!"

Oliver Croxson, Commercial Director

A handwritten signature in black ink, appearing to read "Oliver Croxson".

The Importance of a Peripheral Kit

Retaining bolts used to fit crankshaft pulleys (TVDs) are originally tightened close to their elastic limit (torque to yield fitment). This means that they are likely to have warped, and re-use could lead to poor fitment, snapping or even engine failure.

This is why all GT Automotive popular selling Crankshaft Pulleys come as a kit with OE quality fitting bolts; increasing longevity of the engine to keep you running for longer!
