WE'RE EXPANDING OUR TCK'S...

Material Quality

Our guides, made from premium Nylon, resist heat and wear.

Precision Engineered

Our phasers exceed OE standards, with 200+ VVT references and a growing TCK range.

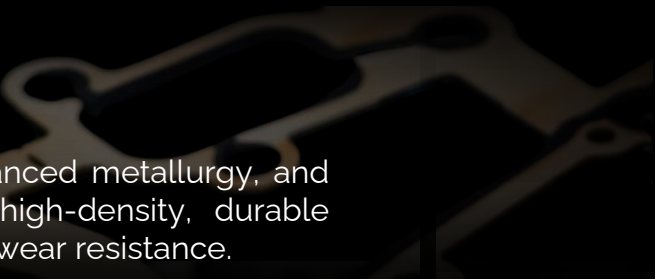

Superior Strength

Precision molding, advanced metallurgy, and CNC finishing ensure high-density, durable sprockets with superior wear resistance.

High-Grade Steel

Chains made from 38CrMoAl and GCr15 steel offer excellent fatigue resistance and minimal elongation.

Rigorous Testing

Our tensioners are rigorously tested and precision-built for durability and OE-level performance.

DURABILITY & PRECISION

Our timing chain kits go through rigorous stress testing to ensure they can handle the demanding specifications of the engine. Our Timing Chain Kits are made to fit most relevant applications, all of our parts are sold as kits, either with or without VVTs and gears, to ensure all components are kept in the same condition and to reinforce their longevity.
