# TIMING BELT KITS...

## Built for Durability

Our kits use Dayco belts, Crafted with premium, high modulus glass fibre cord to withstand high engine heat and friction

## Engineered to Last

Our idler pulleys ensure proper alignment, reducing wear and extending belt life

## OE-Quality Assurance

High quality NSK bearings and solid construction come together to establish efficient engine operation and a belt tension that won't slip

# ULTIMATE PERFORMANCE

Our range of timing belt kits blend innovative solutions with OE expertise. Featuring high-quality NSK bearings, our tensioners optimise engine performance and maintain consistent belt tension. The pulleys reduce wear, friction, and vibration to extend belt lifespan. When paired with a Dayco belt, which withstands heat and friction, our kits are designed to meet or exceed OE standards.
