Aftermarket Parts, OE Quality

Timing Control

Award Winning
Quality

Over 25 Years
OE Manufacturing

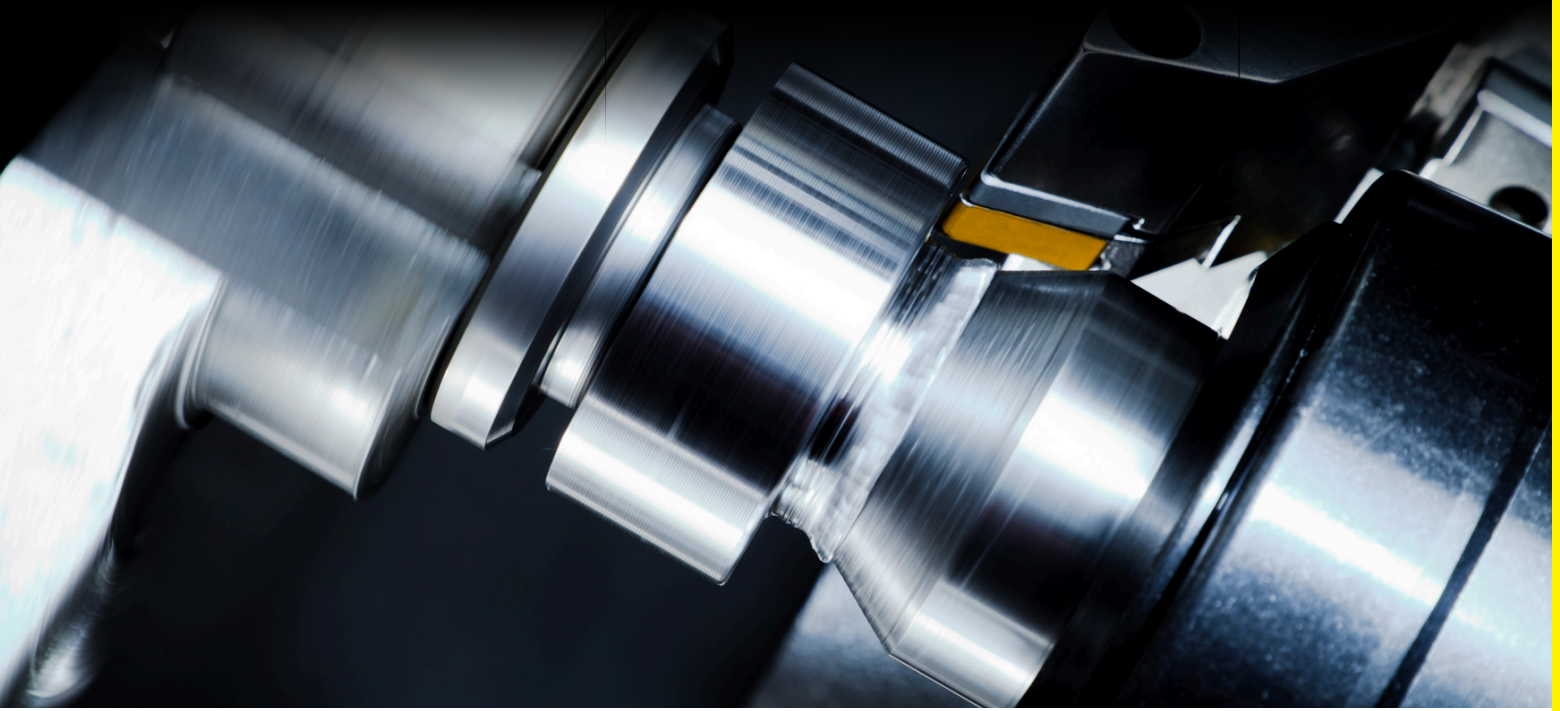

Stocked In the UK
Same Day Despatch

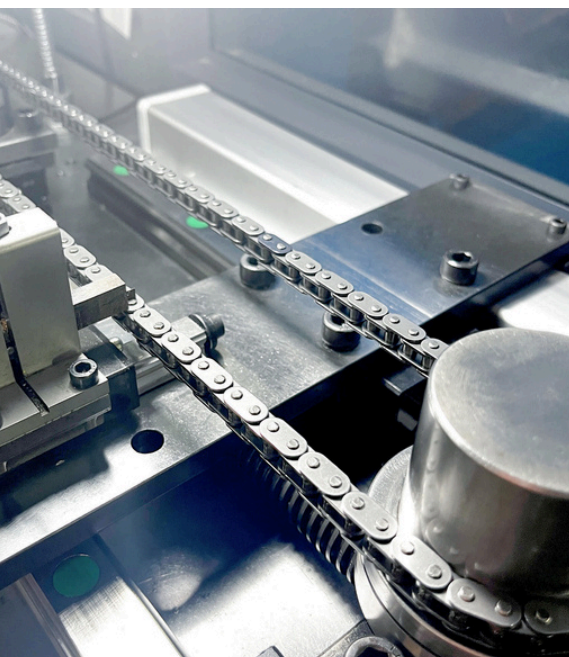

ISO Certified
Safety & Quality

We are **GT**

OUR MISSION

Our mission is to provide the automotive industry with trusted, good value OE quality products and first-class service. All of our parts are stocked, tested and dispatched from our Oxfordshire based warehouse.

- ✓ **OE-manufactured** products at aftermarket prices
- ✓ **Innovative** product solutions
- ✓ Extensive range supported by **manufacturing expertise**
- ✓ Vast **UK held stock** inventory
- ✓ Customer-focused **independent UK brand**

Timing Control

Timing Belt Kits

Much like the timing chain, the timing belt synchronises the upper and lower halves of the engine. It's a simpler system when compared to a chain, as it does not require lubrication. It can be argued that a belt is more efficient due to its smoother rotation and more precise timing.

Wet Timing Belt

There is a variation of timing belts known as wet belts or BIO (belt in oil). The only real difference is that a wet belt runs while submerged in oil. It's common knowledge that belts degrade faster when contaminated with oil, therefore the turnaround on these are higher than standard belts.

RANGE HIGHLIGHTS

GT3140025
For 1.2 Puretech
2012-

GT3145033
For 1.5 BlueHDi
2018-

GT3158022
For 1.4 TDi
2014-2022

GT3102014
For Fiat 1.4l
1999-

Timing Control

Timing Chain Kits

The timing chain synchronises the upper and lower halves of the engine. It acts as a connection between the crankshaft and camshafts, controlling the valves and pistons, and ensures they are correctly timed so these vital components do not collide and break.

Our Quality

Guides

Our guides are manufactured from Polyamide, known for having excellent temperature and wear resistance with low coefficient of friction

Chains

Excellent fatigue and elongation resistance and production line automation, ensures 99.9% tolerance pin point accuracy.

Sprockets

Precision moulding and advanced power metallurgy comes together with machine forging and CNC finishing to a high tolerance threshold.

Tensioners

All tensioners are put through rigorous spring fatigue testing to guarantee high tensions and a tension damping force matching OE.

Phasers

Extensive testing on finished parts, combined with over a decades worth of R&D and production means our phasers are developed to be 1:1 to the original

RANGE HIGHLIGHTS

GTCK005F

For BMW N47D20
2004-2020

GTCK041

For Vauxhall 1.2l
2009-

GTCK070

For Skoda 1.2l
2007-2015

GTCK205F

For 2.0D Ingenium
2014-
